Lance Jordan

Senior Software Engineer, Entrepreneur, Crypto/Blockchain Enthusiast, Musician, Tennis Player
Copiague, New York, United States

Summary

My career history spans a broad spectrum across technology and entrepreneurship. I spent the earlier part of my career in technology in the Travel space, then moved to a full-time career in music production and audio engineering, and finally back to full time development. I have a creative mindset with strong ability to spend many hours concentrating on small details. My strong leadership skills as well as my communication and interpersonal skills give me a dynamic ability to work excellently within teams of all kinds. I had my first Bitcoin wallet back in 2011 and have really gained more interest in the Crypto space over the last several years. Tennis and Music are now my greatest hobbies, and I've been playing competitive recreational tennis for nearly 20 years, and the guitar since age 9. I'm always on the lookout for exciting new opportunities and adventures!

Experience

Geniousness AI
Technical Lead
September 2025 - Present (1 year 2 months)

Caregility
Technical Lead Engineer
November 2022 - August 2025 (2 years 10 months)
